

ACCESSIBILITY

Gran Paradiso Area

ADDITIONS TO THE EXPLANATORY PANELS FOR THE PONT D'AËL SITE AND TO THE SIGNS POINTING TO THE BIVACCO GONTIER

Co-implementing body: The Municipality of Aymavilles

The project includes the creation and installation of information panels to highlight and enhance the natural, architectural and historical features and the touristic potential of the territory within the municipality.

CULTURAL AND HISTORICAL UPGRADE OF THE "VIVRE CHÂTEL-ARGENT" ITINERARY

Co-implementing body: The Municipality of Villeneuve

The project includes the setting up of a permanent tourist and informative walk around the ruins of the castle. Moreover, where the path starts in the heart of the village, a wooden chalet will be built to host an information point.

ENVIRONMENTAL REHABILITATION OF THE REST AREA IN THE HAMLET OF PONT

Co-implementing body: The Municipality of Valsavarenche

The project includes the setting up of a rest area in Pont and aims to bring the area into compliance with law provisions and to meet parking demand during peak tourist seasons.

ENVIRONMENTAL REHABILITATION OF THE REST AREA IN THE HAMLET OF THUMEL

Co-implementing body: The Municipality of Rhêmes-Notre-Dame

The project includes the creation of an information point for tourist reception and information, to replace the small wooden chalet currently open in the rest area of Thumel.

RECLAMATION OF THE FARM ROAD LEADING TO THE RIFUGIO BENEVOLO

Co-implementing body: The Municipality of Rhêmes-Notre-Dame

The project includes the creation of two service and resting areas for hikers and their families along the farm road leading to the Rifugio Benevolo.

UPGRADING OF THE BUILD-UP AREA OF RHÊMES-SAINT-GEORGES THROUGH THE CREATION OF A TOURIST PATH OF THE HISTORIC CENTRE

Co-implementing body: The Municipality of Rhêmes-Saint-Georges

The project includes the setting up of a tourist path in the village of Rhêmes-Saint-Georges, supported by a brochure about the main cultural points of the local area and the creation of an access route and of a rest area near the Espace Loisir.

Mont Avic Area

UPGRADING OF THE PEDESTRIAN PATHS LEADING TO THE PARK IN THE HAMLET OF CHEVRÈRES

Co-implementing body: The Municipality of Champdepraz

The works aim at upgrading the pedestrian paths connecting Chevrères parking area to the entrance of the Park by adding traffic signs and by undertaking supplementary maintenance of the pedestrian ways.

CREATION OF FOOTPATHS CONNECTING VARIOUS PARK SITES IN THE MUNICIPALITY OF CHAMPORCHER

Co-implementing body: The Municipality of Champorcher

The works include the setting up of a "protected" pedestrian path that runs from the Park visitor centre (former Villa Biamonti) to the multipurpose building under construction and the East departure point of the itinerary "Parcours Découverte".

UPGRADE OF THE PARK'S ENTRANCES AND MULTIMEDIA DEVICES

Implementing body: Mont Avic Natural Park

The project includes the installation of multimedia panels and signalling devices, accessible 24/7, providing tourist and naturalistic information.

UPGRADE OF GUIDED WALKING PATHS IN THE PARK

Implementing body: Mont Avic Natural Park

Replacement and updating of the contents on the existing information panels and signs along the marked trails in the protected area and its surroundings.
